

Please do not impose the flag for broadcast. I wish to tape shows and watch at a later time in my own home with my family.

For instance, here is an example.

After dinner I need to go to the store, so I will not be home to watch the show. So I record the show to watch when I return home, after the broadcast has finished.

Without that ability I will miss the show entirely. Never seeing the programming or the advertisements in the program's intermissions.
